

ARMCHAIR TP SPORT

REF. TP SPORT MINOR

DESCRIPTION

Armchair with automatic counterweight folding system of seat, backrest and armrest. Backrest partially upholstered, with protective steel tube bench painted in black. Center and end sides in cast aluminium.

TECHNICAL CHARACTERISTICS

- Metal internal structure.
- Flip-up black polyurethane armrest.
- Seat and backrest cushions in M-4 self-extinguishing cold-cured polyurethane foam.
- Easy removable backrest and seat covers with seat fastener.
- Fire retardant M-1 fabric

OPTIONS

- Row & armchair numbering
- Seat and / or backrest panels in high frequency pressed beech plywood
- Armrests in solid beech timber.
- Installation on telescopic grandstands or fixation on railing system for multipurpose halls.
- Fire proof barrier.
- Movable support with anchor.
- Black aluminium armrest supports

ASSEMBLY

All assembly is completed by pins located on the sides and which enable an individual use of each of the units without causing an impact to the adjacent one. Is mandatory to anchor the backrest to the arc which supports the axis and which combines the counterweight that equilibrates the armchair.

MAINTENANCE

There is no need for maintenance and lubrication. The automatic elevation of the seat through counterweight for a major resistance and a perfect leveller has a minimum service of 120.000 cycles. All of that with a minimum noise during the useful life of the armchair.
