

# FOOTBALL BENCHES TP SPORT

REF. FUBJR

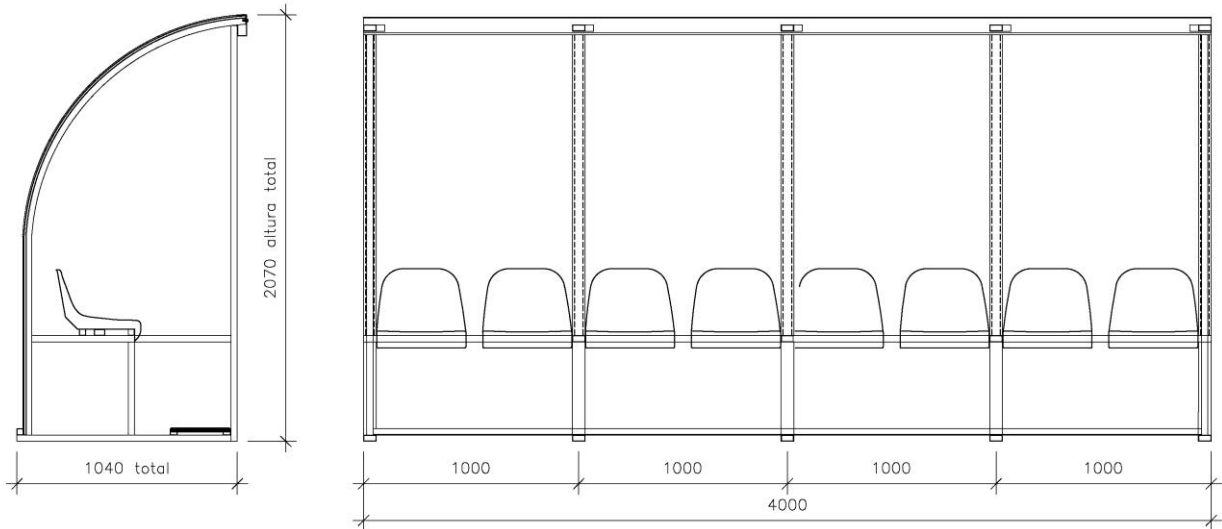

## DESCRIPTION

Benches for football fields, semi-circular model with metallic structure in steel tube 60x30, covered in cellular translucent polycarbonate plates with rubber joints and aluminium profile fixing. Plastic seats directly anchored to the metallic structure

## TECHNICAL FEATURES

- Metal structure in steel tube 60 x 30mm.
- Cover with translucent polycarbonate plates with two cell walls with rubber seal and aluminium clamping profile
- The laterals are made in compact transparent polycarbonate.
- Individual polypropylene seats with back rest, anchored to the metal structure. Floor type WBP plywood 18 mm thick, anti-slip.
- Cold galvanized metal structure with a degreasing treatment, through phosphating bath, dried by hot air and painted with polyester powder polymerized in oven at 200 ° C with a minimum thickness of 70-80 microns
- Standard colour is white (other colours available on request as per RAL)
- Profiles assembled using steel screws
- All our models of benches have to go anchored to the pavement
